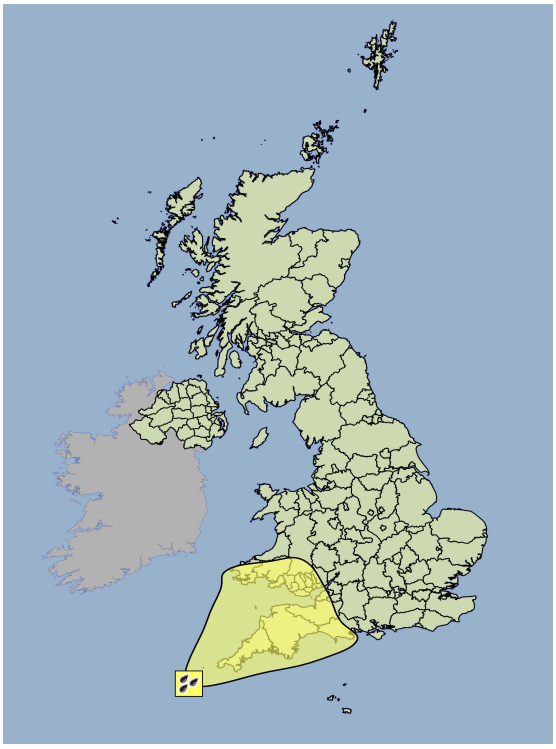
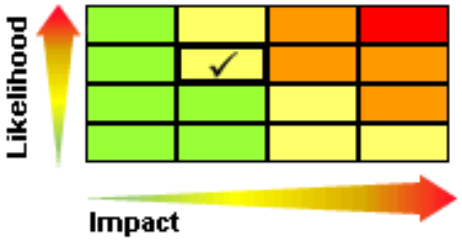
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of heavy rain will move northeast across southwestern areas of England and South Wales early on Friday, with a further 10-20 mm of rain for much of the area and as much as 50 mm over high ground.

The rain will soon clear to the north, but heavy showers will follow and these could produce 5-10 mm within an hour.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:05 on Fri, 25th Oct 2013** until **23:00 on Fri, 25th Oct 2013**

A band of heavy rain already affecting southwest England will move northeast during the first part of Friday, followed by heavy showers.

The public should be aware of the continuing risk of localised flooding, as successive bouts of heavy rain lead to saturated ground.
